

ALPS is a US manufacturer of medical devices since 1989; registered with the US Food and Drug Administration.

ALPS has focused for almost 30 years in designing and manufacturing only high-quality prosthetic liners to provide people all the mobility they need. Thanks to its expertise ALPS is now proud to launch BioStep a new line of feet featuring a cutting-edge technology to improve people daily life.

ALPS Making Lives Better.

**ONE FOOT,  
MULTIPLE POSSIBILITIES,  
INFINITE EMOTIONS**

**BIOSTEP™**

Powered with patented **NRG™** Technology

**A L P S**

ALPS BioStep™ range is a breakthrough innovation among dynamic response feet. Active users can experience a high dynamic response combined with a fluid step and stability on all terrains. ALPS BioStep™ powered with patented NRG™ technology is based on a biomimetic design, enabling dynamic patients to perform a wide range of activities with just one single foot.

## NRG™ Technology

## Inspired by Nature, Empowered by Technology

NRG™ - Natural Reactive Gait - is a patented innovative dynamic response foot technology designed to replicate the natural movement of the calf and shin muscles.

Fluid step with  
a continuous  
dynamic response

## BIOSTEP AT A GLANCE

With NRG™  
Technology

**BIOSTEP EVO**  
Ready for the next adventure

With NRG™  
Technology

**BIOSTEP PRO**  
Do that extra mile!

With NRG™  
Technology

**BIOSTEP CL**  
Your everyday companion

With NRG™  
Technology

**BIOSTEP XT**  
The relentless energy

**BIOSTEP LP**  
Low build height for  
a great freedom

## KEY FEATURES

Unique multi-layer construction

Exclusive and patented reverse shank design

Advanced flexible ergonomic design

## KEY BENEFITS

Physiological and energy efficient gait

Smooth rollover during the whole gait cycle

High dynamic response to support an active lifestyle

Possibility to do a wide range of activities with just one single foot

Ground compliance and stability on all terrains

Reduction of secondary issues thanks to a more balanced posture and symmetrical gait

Low maintenance

Lightweight

## SPOTLIGHTING PRODUCTS

### ALPS SOUTH MAKING LIVES BETTER

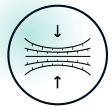

The comfort and efficiency of a prosthetic device relies on having the right liner. This is why for almost 30 years ALPS has been dedicated to designing and manufacturing only the highest-quality prosthetic liners to provide users with all the mobility they need.

Enhanced comfort

Freedom of movement

Safe suspension

At ALPS we formulate different types of gel and silicone to satisfy each individual's needs: identify the best prosthetic solutions based on both your lifestyle and clinical profile with Choose Your Liner.

Thanks to our dedication to innovation, we've developed other high-quality prosthetic solutions in addition to prosthetic liners, inspired by the slogan which has been driving the company since 1988: Making Lives Better.

### Vacuum Integrated Pump

The ALPS V.I.P. is an air expulsion integrated pump providing elevated vacuum. It allows continuous total contact, essential for distributing weight evenly. The elevated vacuum created by the V.I.P. stabilizes the residual limb, effectively overcoming any issue connected with the residual limb's changing volume throughout the day.

### Silicone PRO liner

ALPS Silicone PRO features an innovative and hypoallergenic medical grade silicone which adheres delicately to the skin of the residual limb. It is indicated for residual limbs with redundant soft tissue and for transfemoral users.

### Prosthetic Socks

Prosthetic Socks for volume change management are available in 3 different thicknesses, in 3 sizes, in 4 lengths and with or without hole. ALPS offers both single packets and the practical ALPS Socks Bundle set that includes several socks in different thicknesses, to allow you to handle variations in limb volume easily.

Choose Your Liner

ALPS is a US manufacturer of medical devices since 1989; registered with the US Food and Drugs Administration.

ALPS has focused for almost 30 years in designing and manufacturing only high-quality prosthetic liners to provide people all the mobility they need.
